YayCazz

FAIR LAUNCH

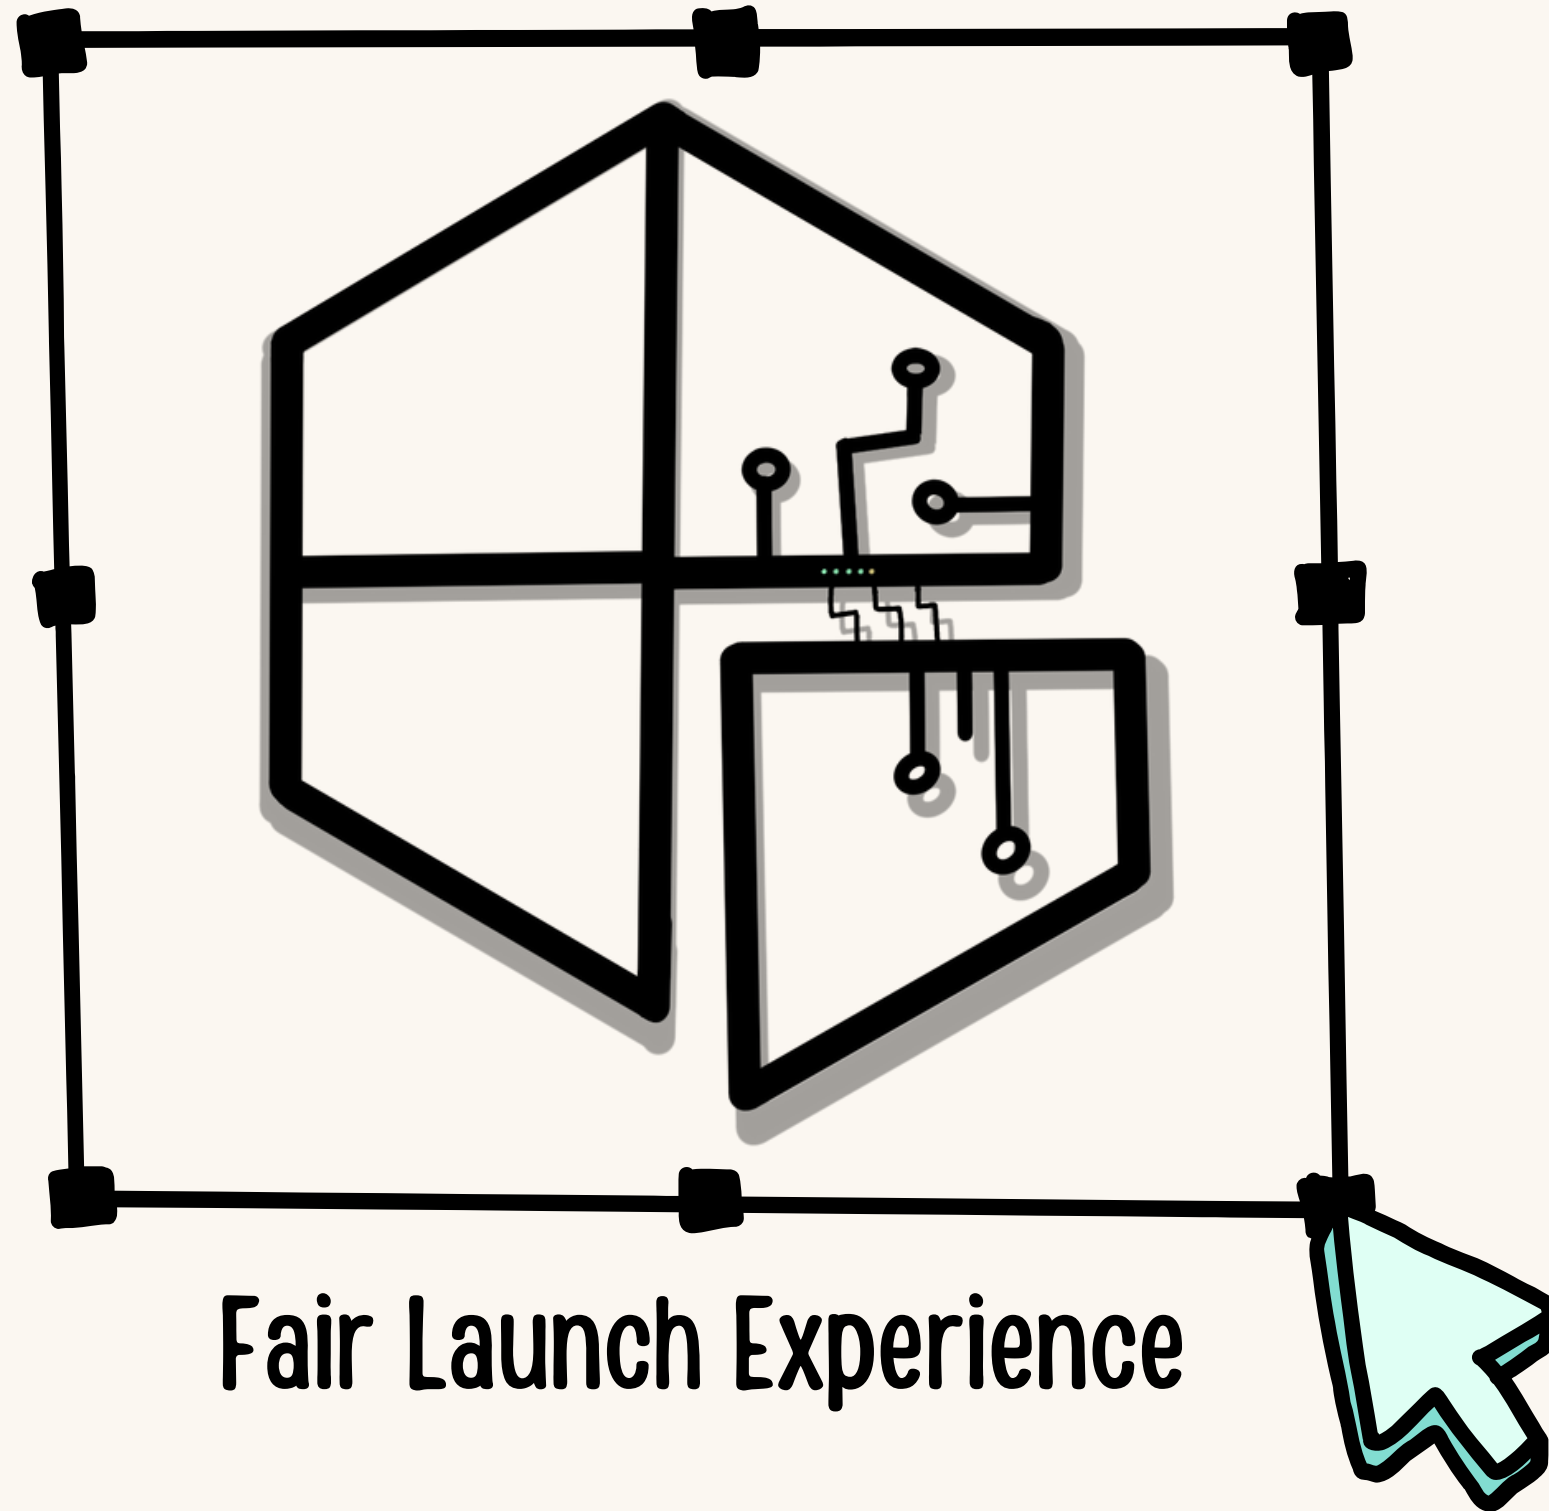

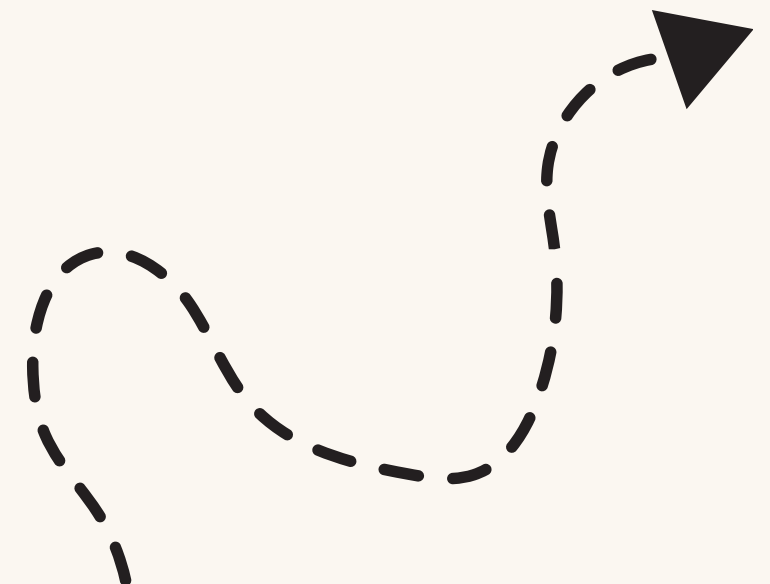

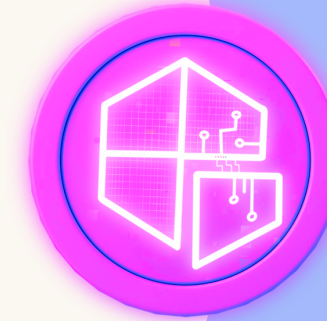

# YayCazz

YayCazz revolutionizes token distribution with a unique inscription minting process, embodying the principles of a fair launch on the Solana blockchain.

This approach aligns with Solana's fast block generation, offering rapid and efficient token allocation per block.

Our platform is not just a technological advancement but a step towards a more inclusive and equitable crypto landscape, where access and opportunity are evenly distributed among all participants fairly.

# TOKEN DISTRIBUTION CHALLENGES

## Problem

- Inherent Market Barriers
- Accessibility and Fairness
- The TVL Dilemma

Traditional token launches often face issues such as bot manipulation, uneven distribution, rug risks and high entry barriers, leading to a lack of trust and accessibility for potential investors.

The complexities and risks associated with Total Value Locked (TVL) in tokens further exacerbate these challenges, creating a need for a more secure and balanced approach.

# YAYCAZZ SOLUTION

A block and luck-based mint experience to prevent unnecessary whale formation in tokens due to botting during mint.

**Bot  
Proof**

A solution where people can safely transfer their funds to the token and get back the money they invested if there is a failure on the token.

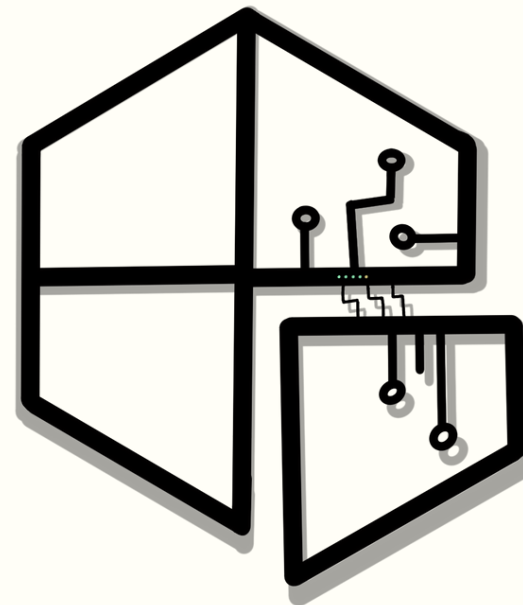

**Risk Free  
Investment**

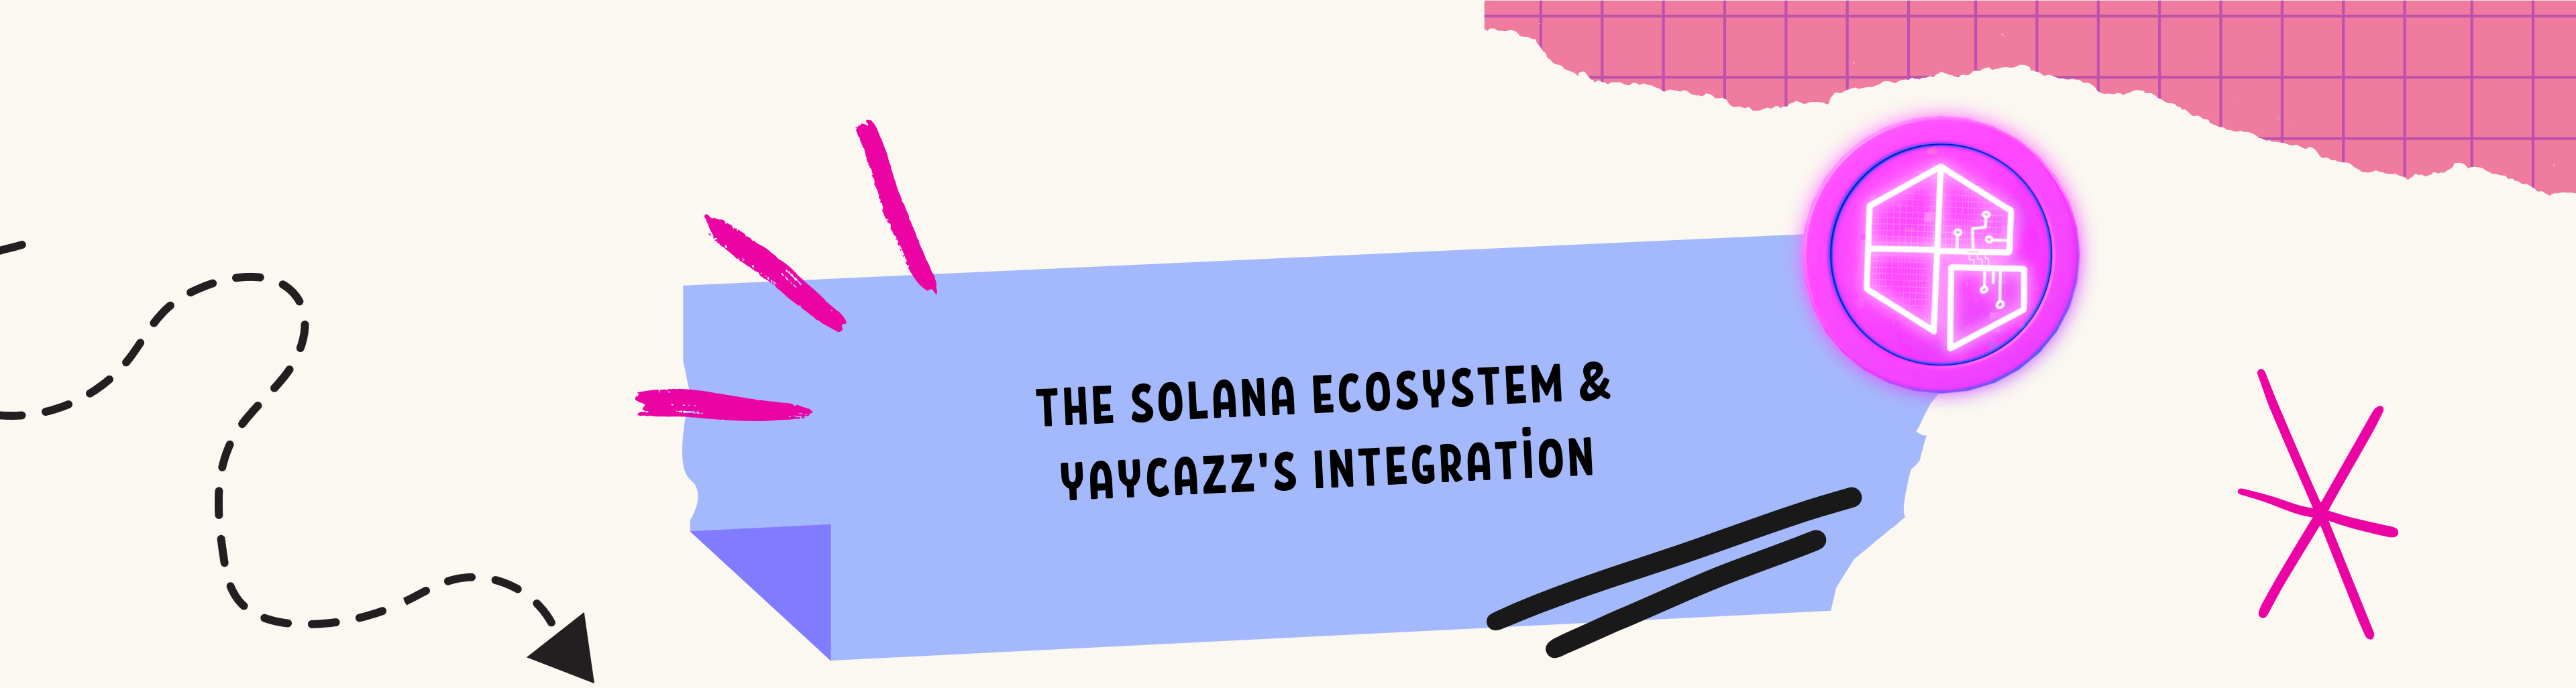

With a fully autonomous system to prevent the collected funds from being seized by the token owner or any other 3rd party. Launch and create LP automation.

**Trust  
chain**

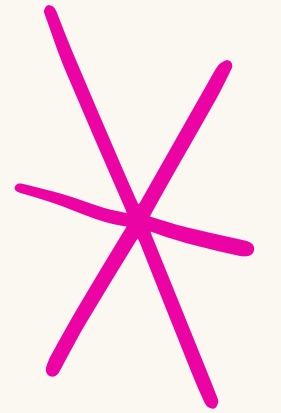

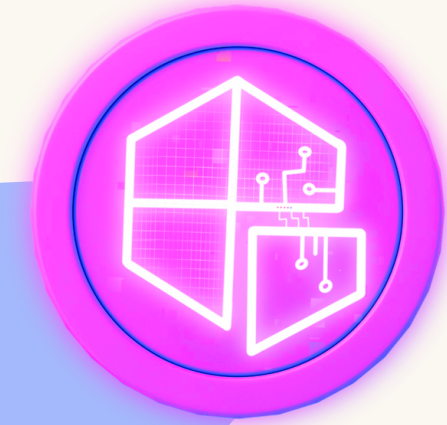

A mint experience without FOMO due to mint duration and block production time. The experience here is a comfortable and fluid mint experience based on time and blocks.

**Smooth  
launch**

## THE SOLANA ECOSYSTEM & YAYCAZZ'S INTEGRATION

### ADVANCE 1

YayCazz leverages the robust capabilities of the Solana blockchain, renowned for its high-speed and low-cost transactions, to offer a groundbreaking platform for token and NFT distribution.

### ADVANCE 2

The integration with Solana not only accelerates the minting process but also contributes to a healthier Total Value Locked (TVL) in the ecosystem, reflecting a stronger and more secure financial environment.

### ADVANCE 3

Our platform's innovative approach is perfectly aligned with Solana's advanced blockchain technology, enabling us to provide a seamless, scalable, and secure experience for all participants in the DeFi space.

# YAYCAZZ OVERVIEW

The screenshot shows the YayCazz website interface. At the top, there's a navigation bar with links: Road, Pool List, Create Fair Launch, and a 'Select Wallet' button. The main content area is divided into two columns. The left column displays token information for 'YAY': Total Supply (100000000), Start time (December 25th 2023, 12:10:00 am), End time (December 26th 2023, 12:10:00 am), Remaining (11380), Price (0.05), Success Rate (0.00%), Valid Mint (0), and Total Try (0). A yellow warning box states 'These pool is canceled. You can claim back your fund'. Below this are 'Claim' and 'Select Wallet' buttons. The right column lists 'Minting Rules for YayCazz Token' with five bullet points. A large handwritten note 'Always use burner' with a fire emoji is overlaid on the right side. The footer contains the copyright notice 'Copyright © 2023 - All right reserved'.

Minting Rules for YayCazz Token

- One Block, One Winner: Our minting process is block-based. For each block, only one transaction will be victorious in acquiring the token.
- Liquidity Contribution: Unsuccessful mints are not in vain. Assets from non-winning transactions contribute to the liquidity pool, enhancing overall value.
- Anti-Bot Measure: Bots beware. Automated actions increase the liquidity pool, not your chances. Our protocol is designed to favor genuine participants.
- 24-Hour Guarantee: If the minting isn't complete within 24 hours, you're entitled to retrieve your SOL.
- Claim Your Token: Success in minting? Congratulations! Claim your YayCazz token directly through our website's seamless process.
- Participate fairly, enhance liquidity, and embrace the YayCazz advantage.

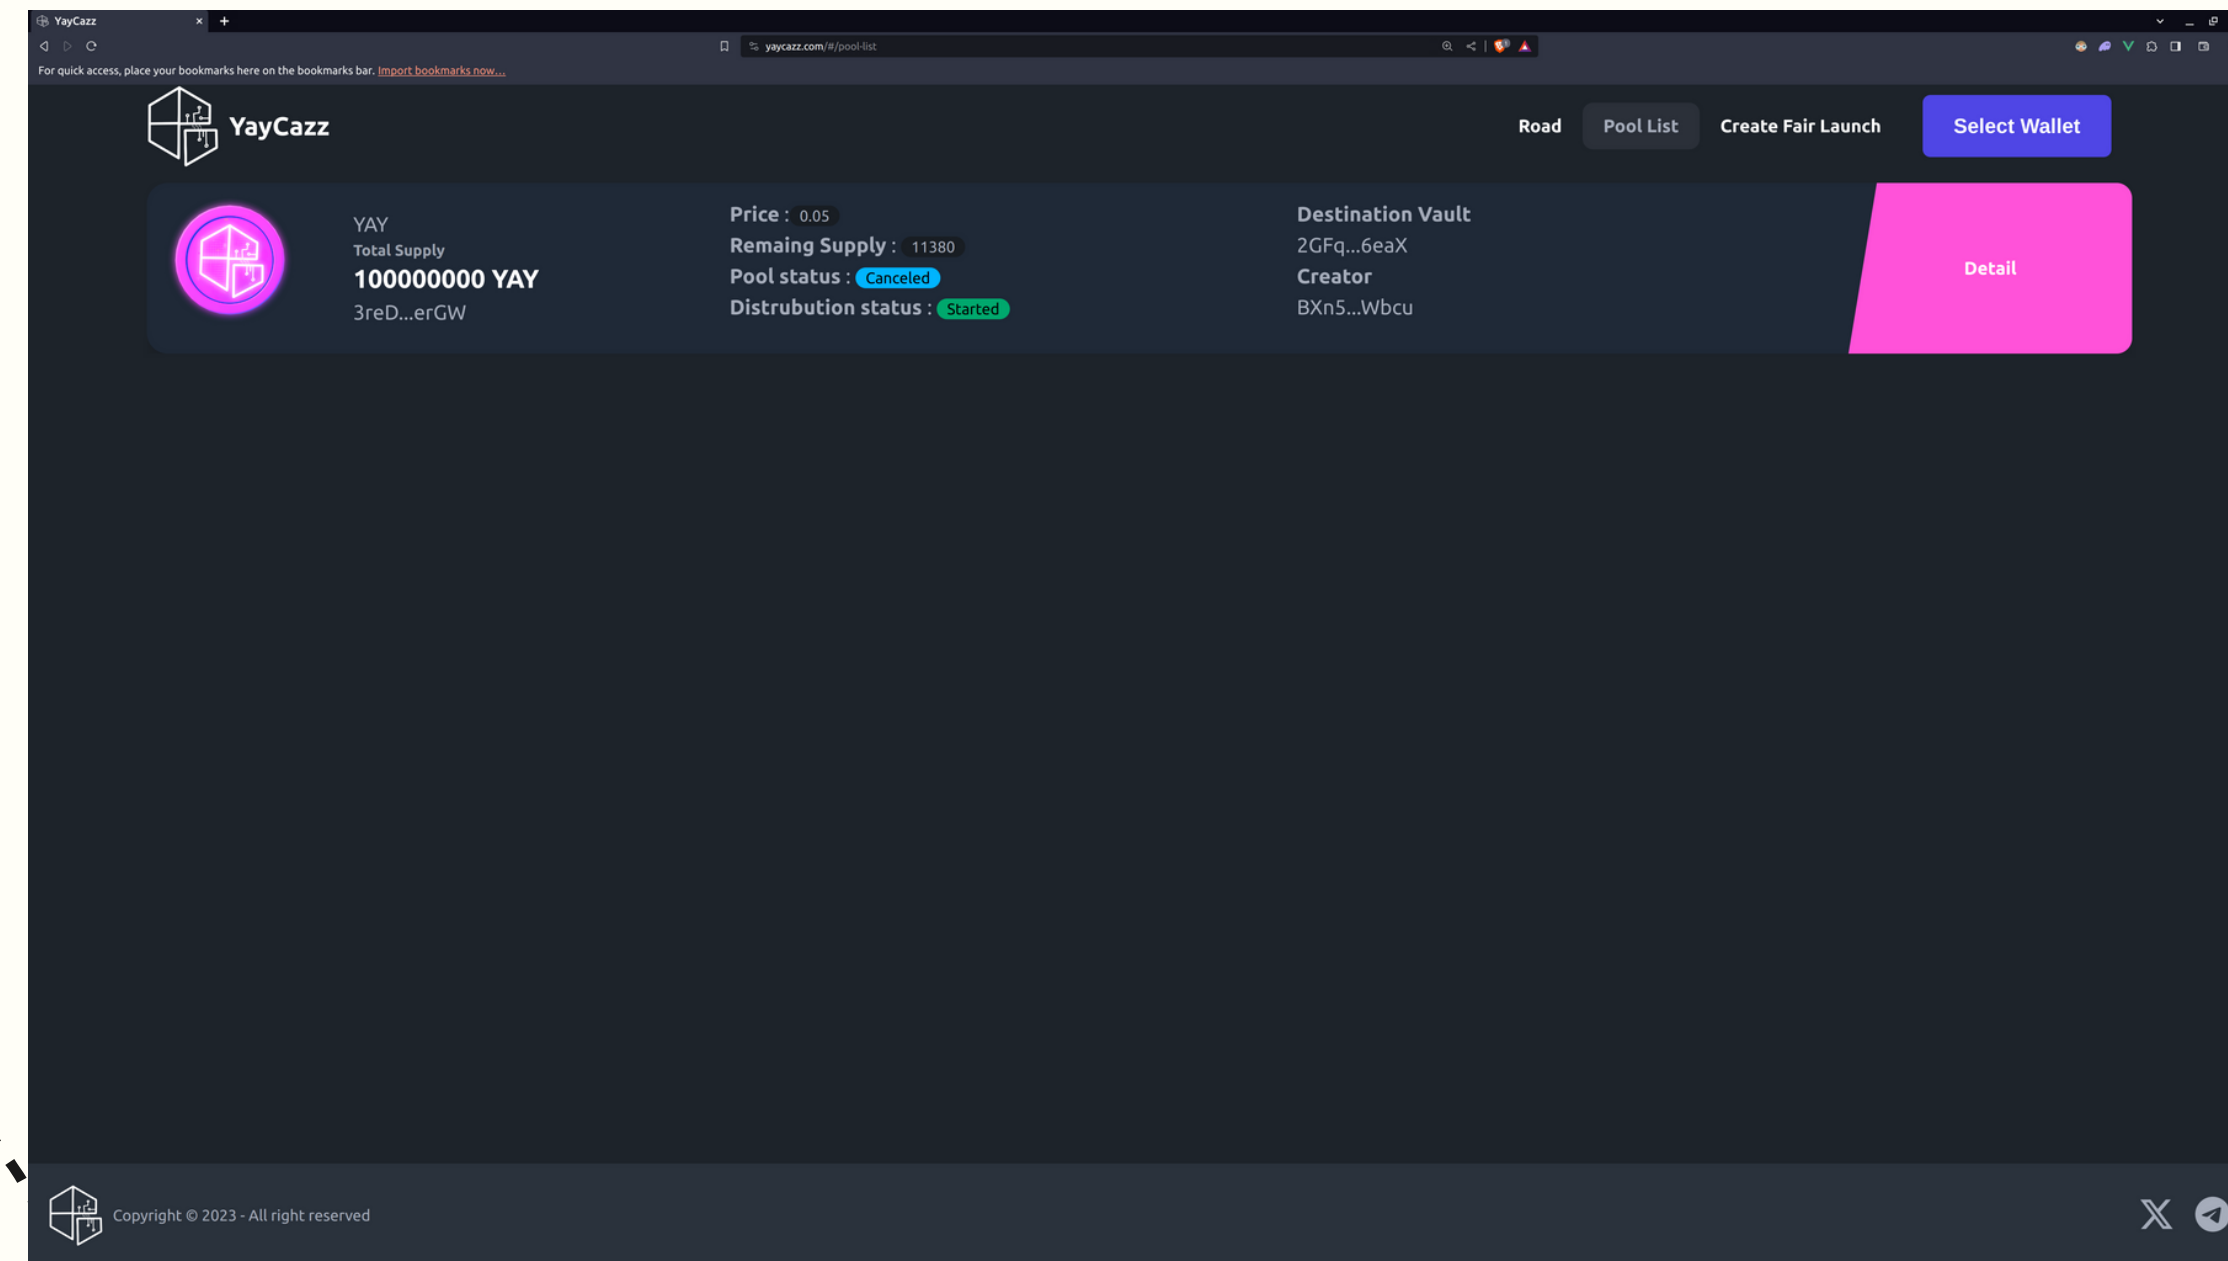

Always use burner 🔥

# ACTIONS

- On the home page, the proposed token will appear at this point. When the other tokens are released, they will be featured on the home page one by one, thanks to the yaycazz team.

# YAYCAZZ OVERVIEW

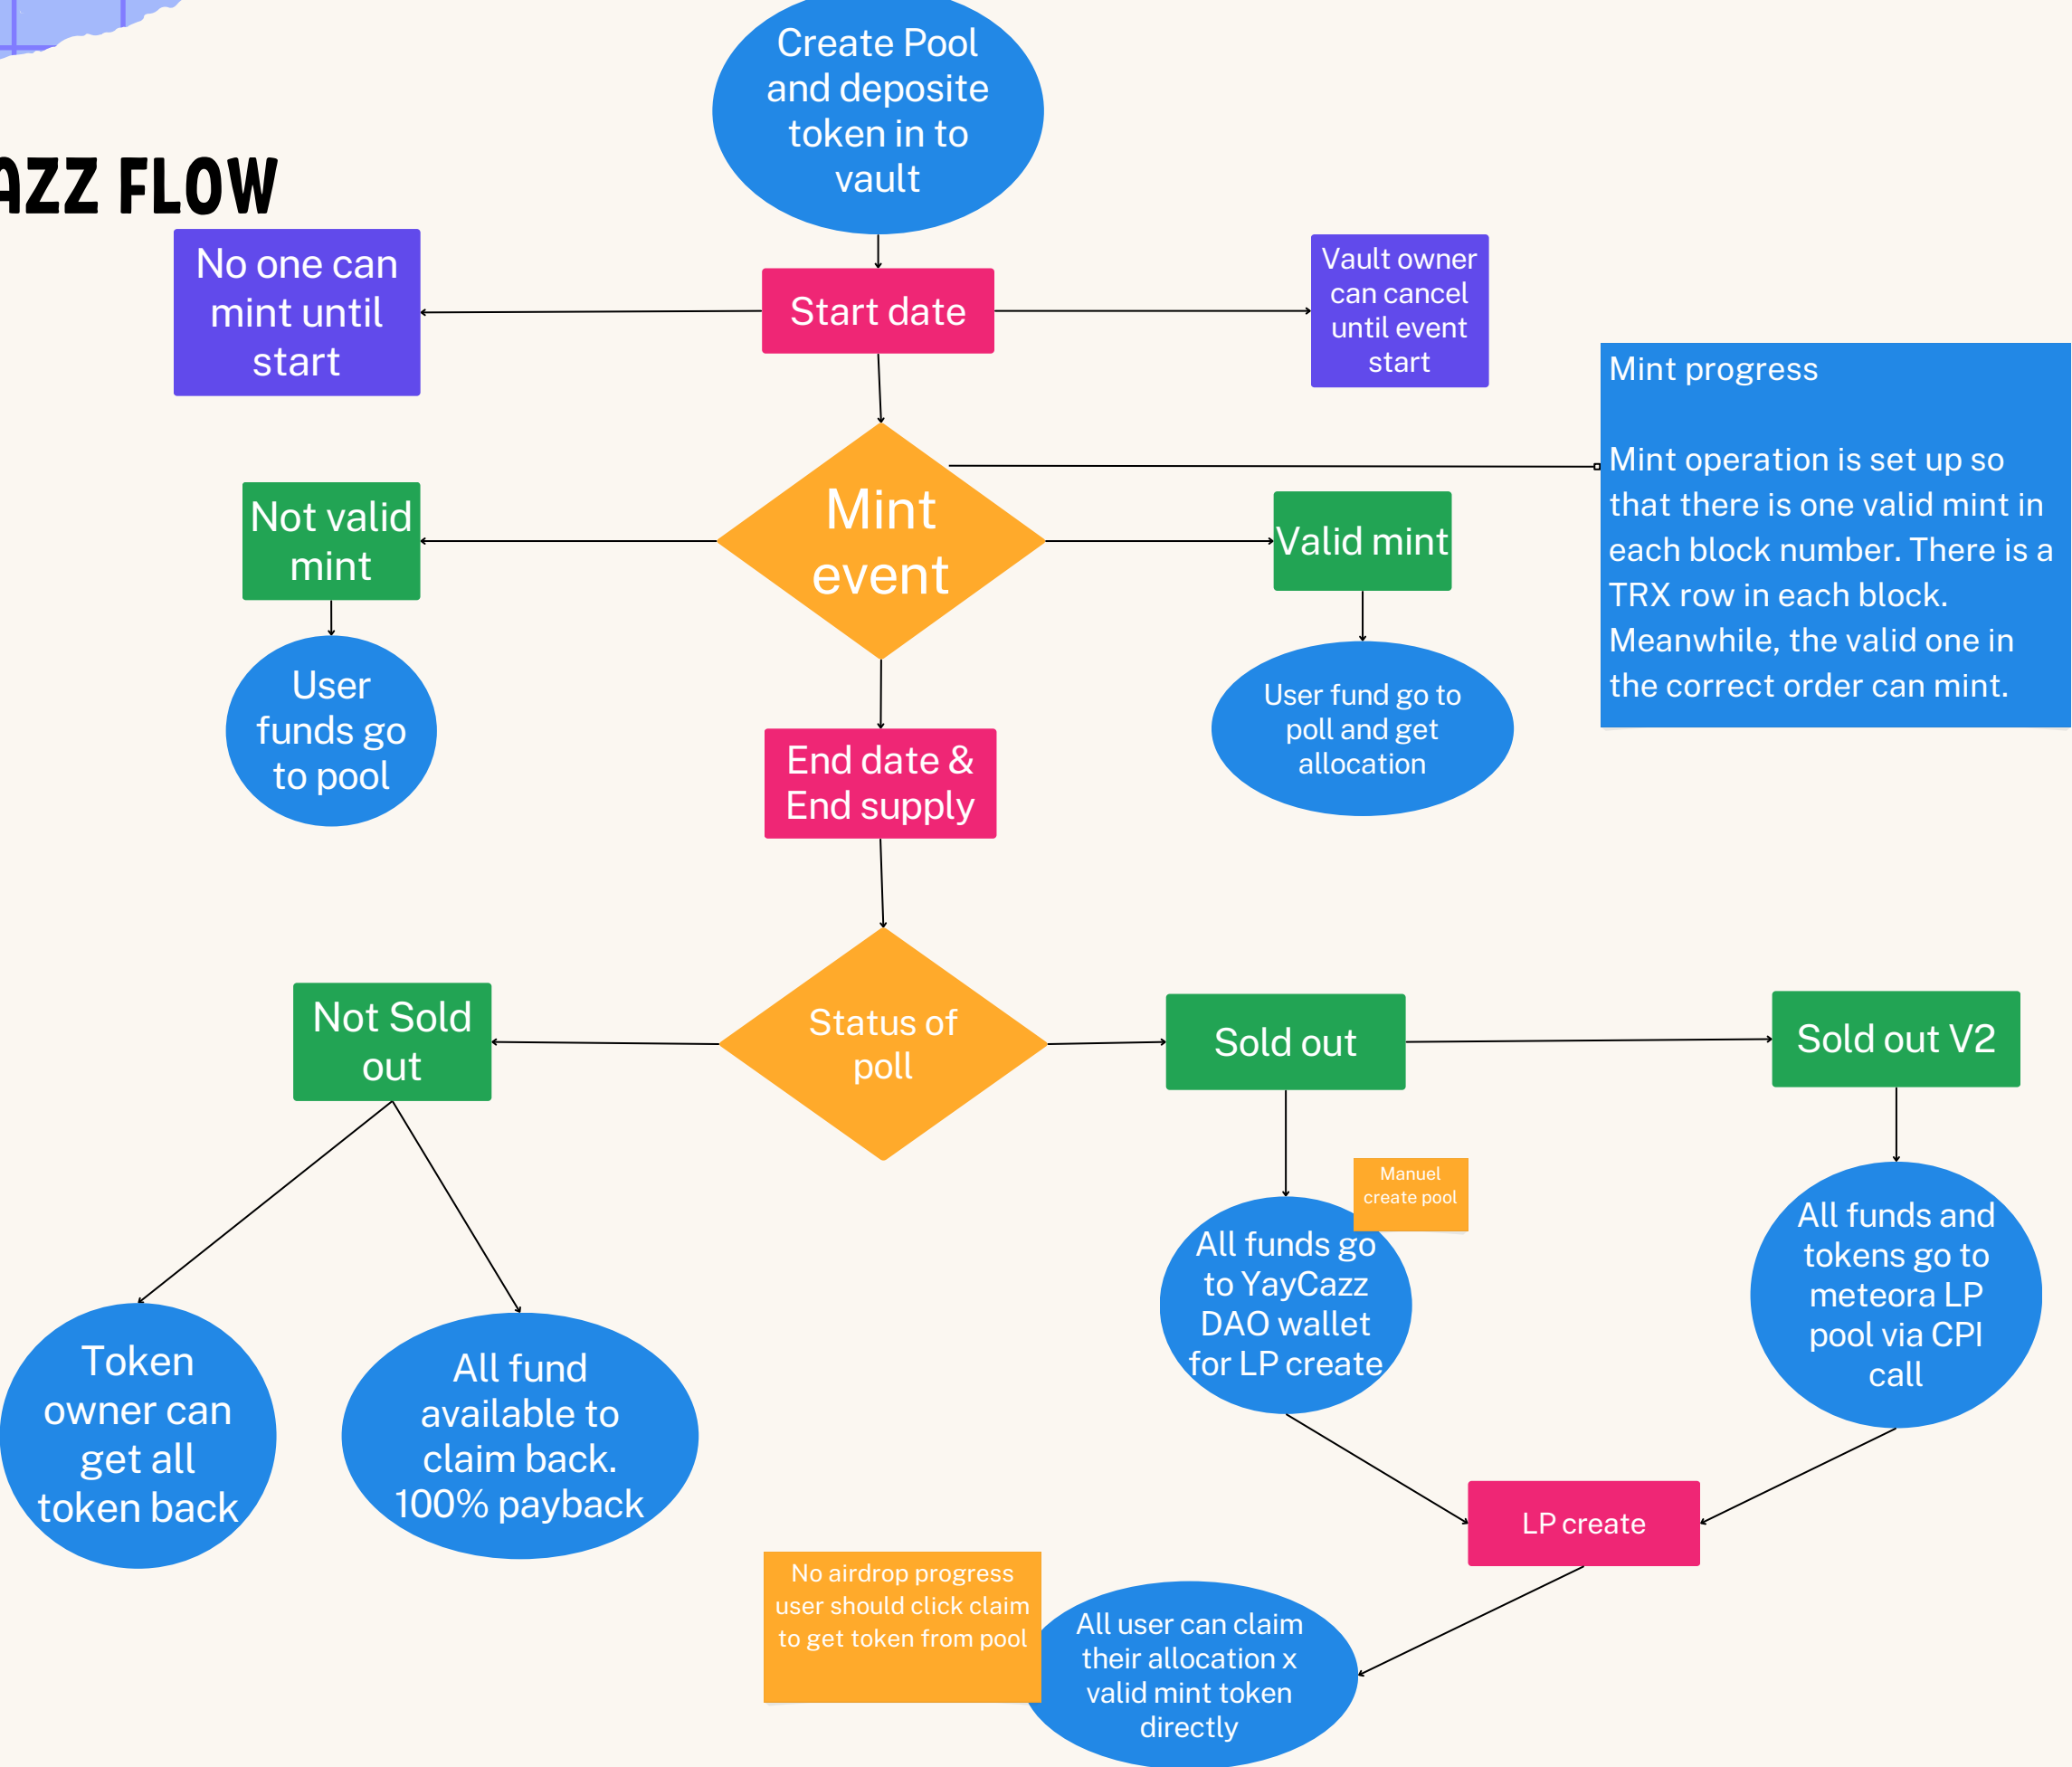

# ACTIONS

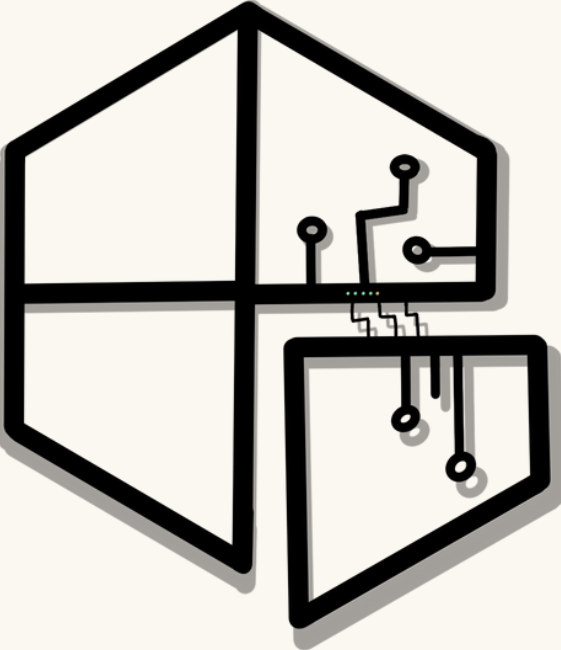

- token list and details. Onchain information will be listed here along with the history of each new token that will be released.
- Create pool page is soon after \$YAY launch

YAYCAZZ FLOW

EACH BLOCK  
HAS ONLY ONE  
VALID MINT  
**INSCRIBE**

## Tokenomics

- %49 mint, %49 LP, %1 team, %1 DAO. and all is simple as like that.

## Planning

- YAY token mint event will be held on our own platform. It raised \$10K on his first try and distributed it back safely because of the unsuccessful mint. The next mint will be in January and will be tried until the success mint.

## Emission

- Many transactions on the YayCazz platform will require \$yay tokens. The most important of these is to launch tokens.

## DAO

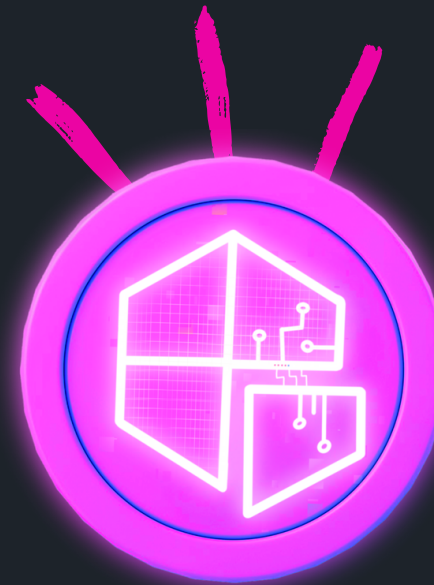

- The DAO will keep the 1% it receives at a multisig address for a long time to be used to make new agreements or run the system. Necessary exits will be made at the discretion of the entire community. Who knows, maybe we can build an LST system.

## Vision

- We want the token to be both a utility and an investment. Our perspective on a token is to create a strong LP pool and usage area. If the token is strong, the product is even stronger.

## Team

- The team will keep 1% for their efforts in the development phase and to contribute to the decisions in the voting in the system. There will be a 2-year lock with monthly expansion.

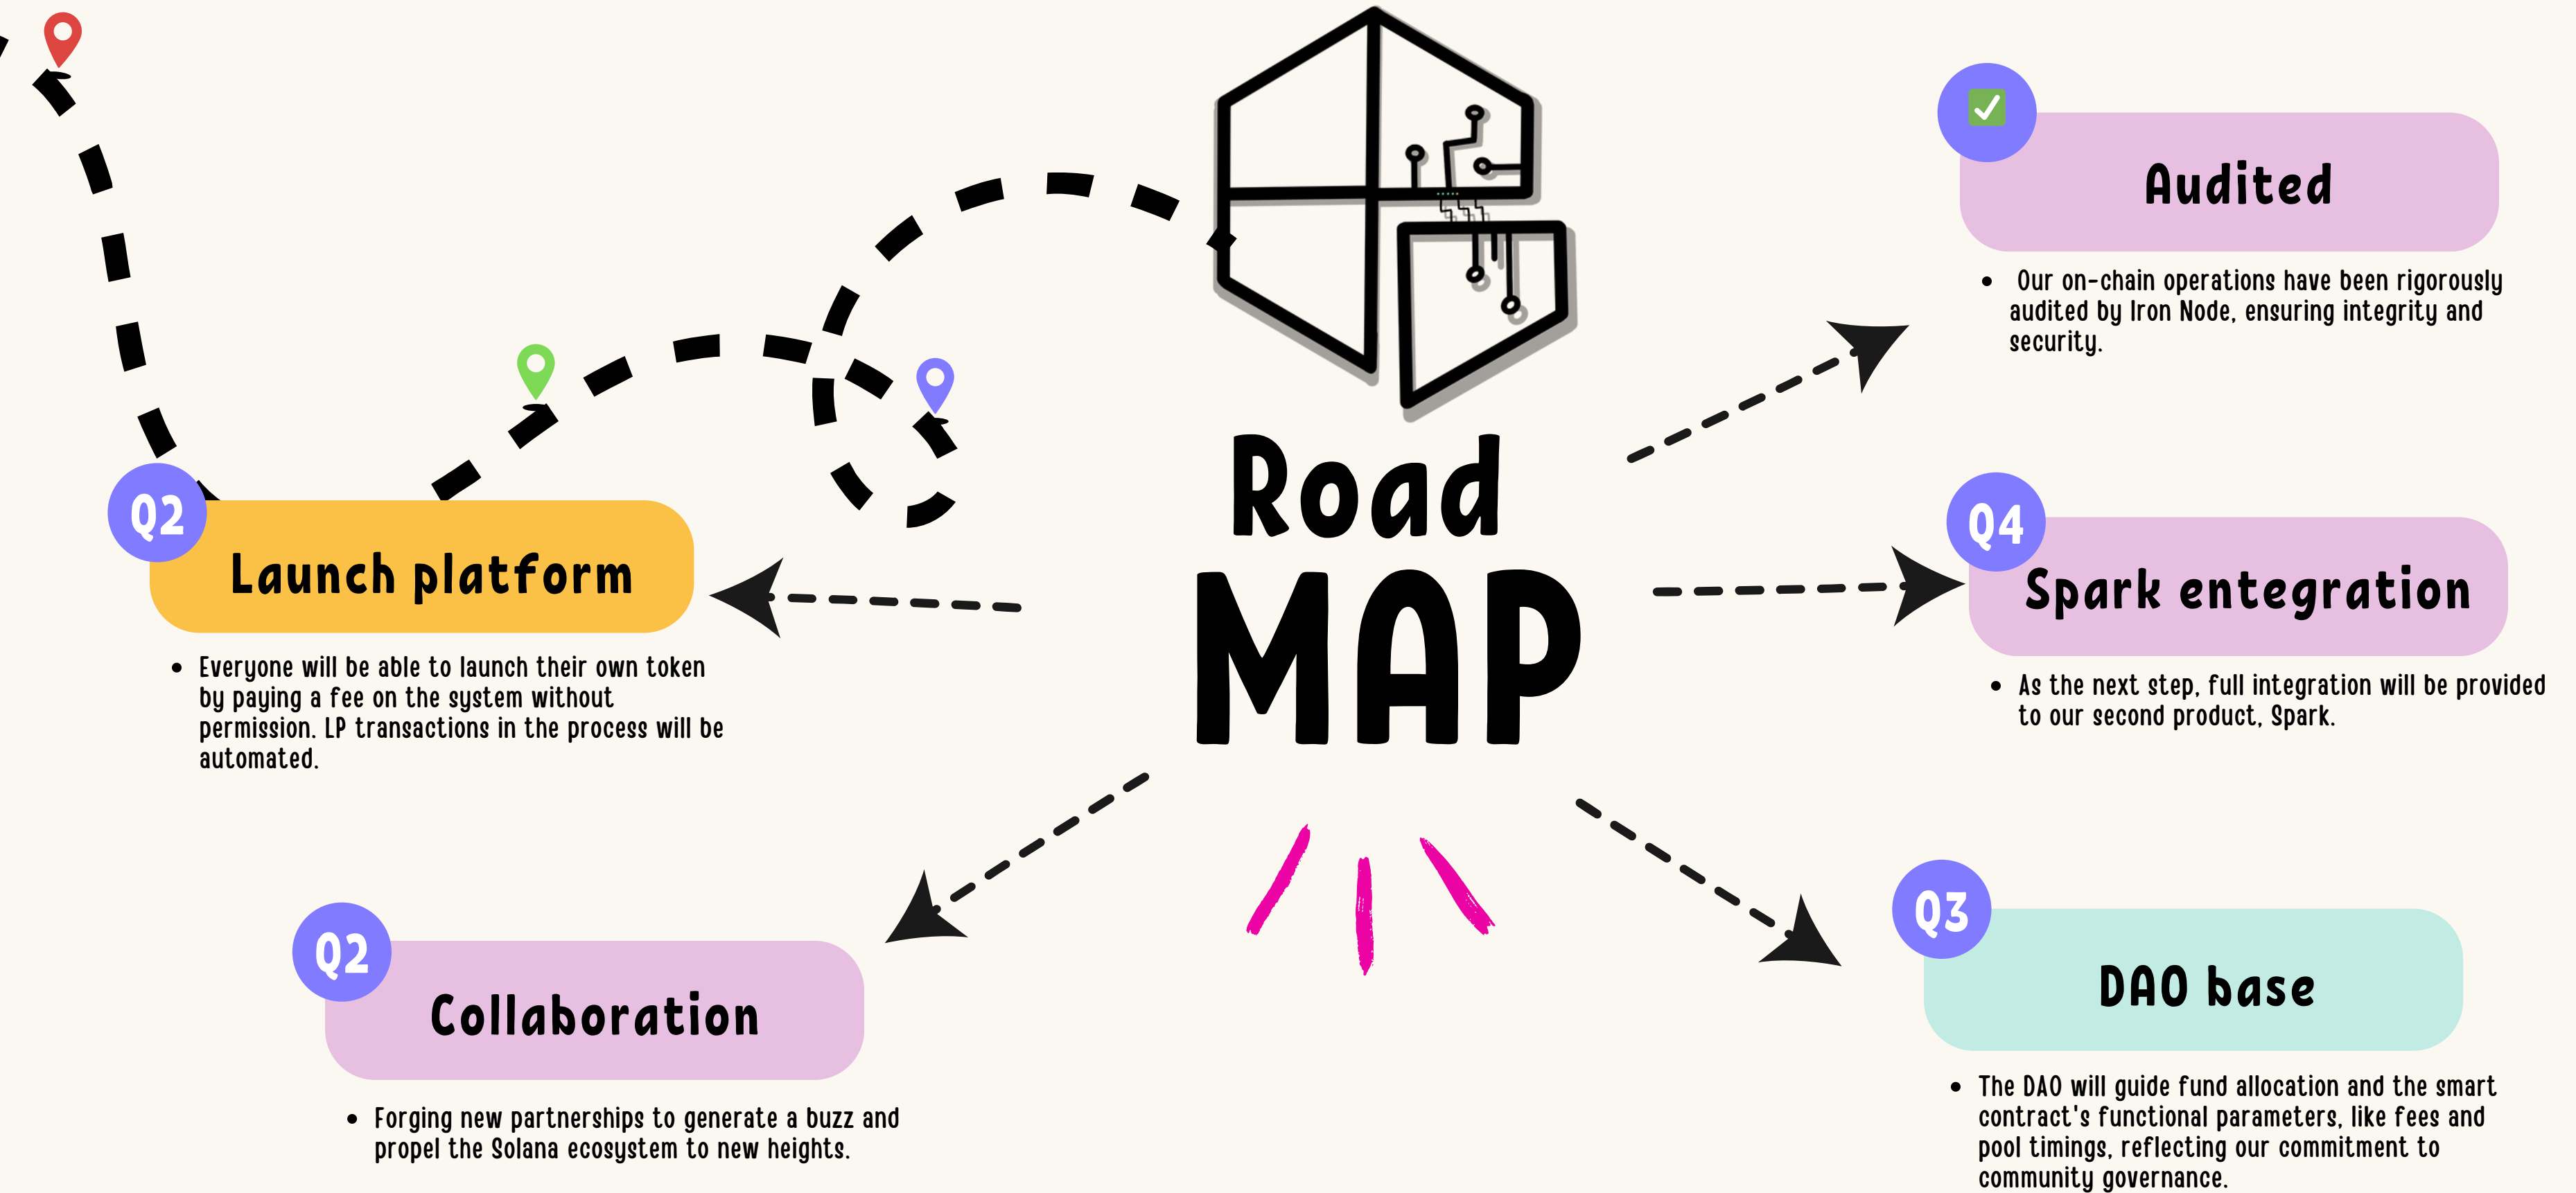

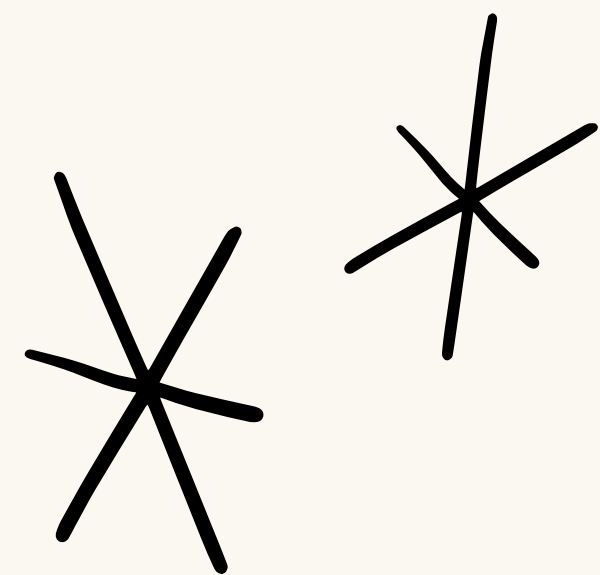

# \$YAY

# Why You Should Mint \$YAY

- 2** The Launch of Potential:  
When \$YAY mints out, witness the transition from minting to meaningful market contribution."
- 4** Opportunity for Early Adopters:  
As a minter, join a growing ecosystem where early participation can lead to significant rewards as \$YAY gains market traction."

- 1** Risk-Free Engagement:  
Reclaim your investment if the mint doesn't sell out, ensuring a secure start to your journey."
- 3** Liquidity Pool Strength:  
Successful minting feeds into a robust liquidity pool, underpinning the token's market stability and growth potential
- 5** Sustainable Growth:  
\$YAY is designed for a gradual increase in value, focusing on long-term growth rather than short-term speculation."
